OPADOTUN TAIWO OLUWASEUN

Lagos State, Nigeria | +234 7033515260 | officialopadotun2021@gmail.com | LinkedIn | Portfolio

PROFESSIONAL SUMMARY: Data professional with experience in fintech and consulting, using analytics to improve product performance, retention, and credit risk. Skilled in collaborating with teams to resolve data issues, build reliable workflows, and deliver actionable insights.

AREA OF EXPERTISE

Data analysis - SQL, python (EDA), Power BI, Metabase, Looker studio, Advanced Excel,numpy, pandas, scikit-learn library, Classification models: Logistic Regression

Data engineering - GCP, Airflow, Git, DBT, DLT, python scripting for ETL, Docker

Databases & warehouses - BigQuery, AWS Redshift, Clickhouse

WORK EXPERIENCES

Data engineering, Alerzo Limited, Lagos, Nigeria *October 2025 - November*

- Refactored and optimized an RFM model segmentation pipeline using dbt, modularizing SQL transformations and resolving inefficient joins to improve model performance and maintainability.
- Established automated data quality checks using dbt Expectations and generic tests to validate schema integrity, uniqueness, and null constraints, ensuring reliable datasets for business reporting.
- Developed a monitoring and alerting system using Python and Apache Airflow to detect pipeline failures and notify engineering teams channel in real time.
- Maintained well-documented, version-controlled DAGs and data pipelines following production best practices.

Data analyst, Alerzo Limited, Lagos, Nigeria *2023 -August, 2025*

- Led a team of two to build self-service dashboards used by leadership and cross-functional teams to monitor an average monthly TPV of ₦12bn across the country, reducing ad-hoc data requests by 40% and accelerating data-driven decision-making in power bi.
- Worked with the product manager to define product metrics and KPI tracking for product adoption and growth across digital web and app products
- Developed an SQL-based dashboard to analyze merchant financing risk, revealing a 5.31% default rate and informing decisions on the product feature continuation.
- Developed and maintained an RFM customer segmentation model using SQL, enabling the customer service team to prioritize and reactivate high-value users, resulting in a 20% increase in active merchants within one month.
- Collaborated with the Data Engineering and Finance Reconciliation teams to investigate incomplete financial transaction records, identify root causes, and document findings in ClickUp to support issue resolution and system monitoring.

Data analyst, BST consulting Limited, UK *October 2022 - 2023*

- Worked closely with the business analyst to build credit reporting templates for Nigerian and UK clients to conform with basal III regulation.
- Gathered business requirement for Regsuite a financial institution Basel regulation reporting software
- Managed and prioritized assigned tasks and projects using JIRA, ensuring timely completion and adherence to project timelines.
- Delivered client training during project handover after designing and implementing credit rating templates.

ACADEMIC QUALIFICATIONS

Post graduate diploma *(PGD)* Innovation and design Nigeria University of Technology and Management

Bachelor of Agriculture (BSc Honours) Agronomy - University of Ibadan (UI), Ibadan, Nigeria (*First Class Honors*)

CERTIFICATIONS

Google Cloud Professional Data Engineer	2025
Advanced Google Data Analytics Certificate	2024
